## September 26-28, 2018

### Buffalo Niagara Convention Center

Convention Center Plaza | 153 Franklin Street | Buffalo, New York 14202

# YOU'RE INVITED

On behalf of the UB Dental Alumni Association, we would like to invite you to the 41<sup>st</sup> Annual Buffalo Niagara Dental Meeting(BNDM), September 26-28, 2018.

Our Buffalo Niagara Dental Meeting committee along with our meeting coordinators worked diligently to find ways to build a high quality meeting that you can experience over 2 ½ days right here in Buffalo, NY. Whether you are from a local office or have traveled a longer distance to get here, your time will be well spent. Did you know New York State Education Law requires dentists to complete 60 contact hours of continuing education in each 3-year registration period and dental hygienists are required to complete 24 contact hours of Continuing Education (CE) during each three-year registration period. Dentists are required to complete 42 of the 60 contact hours via live courses and dental hygienists are required to complete at least 14 of the 24 contact hours required for a 3-year registration. The good news is that you can earn up to 12 live CE credits at the Buffalo Niagara Dental Meeting for one very low price! For dentists it is less than \$21 per credit.

Take advantage of our nationally recognized speakers for dentists, hygienists, front office, assistants and free hands-on programs! This year we are also offering FREE parking at Buffalo RiverWorks for all pre-registered attendees! No more searching for parking places and paying those high prices.

We would like to invite all attendees to stay after the day's meetings on Thursday and enjoy Happy Hour up on the Exhibit floor. Enjoy a complimentary drink and snacks while you network with your friends, colleagues and exhibitors.

We wish to thank Dean Joseph Zambon and the entire faculty and staff of the UB School of Dental Medicine for their support of the Buffalo Niagara Dental Meeting. We want to welcome all of the dental students who are the future of the Alumni Association.

Thank you to our generous corporate sponsors and exhibitors. Their support allows us to bring you the region's premier dental event.

So plan on attending the 2018 Buffalo Niagara Dental Meeting to enjoy another exciting and valuable dental meeting!

Joseph S. Modica, DDS '82  
*President*  
*University at Buffalo*  
*Dental Alumni Association*

## GENERAL INFORMATION

### Cancellation Policy

Cancellation requests must be received by September 13, 2018. All approved refunds are subject to a \$25 processing fee. No refund or cancellation requests will be accepted after September 13, 2018.

### Mandatory Breaks

There will be mandatory morning and afternoon breaks during the Buffalo Niagara Dental Meeting courses. Please take this time to visit our exhibitors.

### Course Disclaimer

The Buffalo Niagara Dental Meeting's committee makes every effort to present high-caliber clinicians in their respective areas of expertise. The presentations of the instructors in no way imply endorsement of any product, technique or service presented in the courses. All participants are cautioned about the risks of using new techniques, especially in courses that have not provided them with supervised clinical expertise.

### CE Credit Verification Forms

\*One CE Verification Form will be included in your registration packet for ALL lectures you attend throughout the meeting.

\*Complete the verification form as you attend lectures, including course titles, instructor's name, and verification codes.

\*Submit the top copy of the verification form WHEN YOU COMPLETE YOUR LAST COURSE. Keep bottom/carbon copy for your records. This is your only record of attendance. Collections boxes are located in the convention center lobby. CE Verification Forms MUST be submitted at the convention center and will not be accepted at the university after the meeting.

### ADA CERP

University at Buffalo Continuing Dental Education is an American Dental A CERP Recognized Provider.

ADA CERP is a service of the ADA to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at [ADA.org/CERP](http://ADA.org/CERP).

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between the UB Continuing Dental Education department and the UB Dental Alumni Association. UB CDE is an approved sponsor for NYS and

verifies at least one full-time employee and the facilities, equipment, financial and physical resources to provide such programs as required by NYS Education Law. Some courses may not be acceptable for New York State mandatory continuing education credit. Other organizations (AGD, ADHA, DANB, etc.) have different requirements for acceptable continuing education courses. Please submit copies of your CE credit form to those organizations when needed. Direct specific questions regarding CE Credits to the University at Buffalo, Office of Continuing Dental Education at (716) 829-2320.

### NY CE Reporting Period

Every dentist and dental hygienist registered to practice with a New York State license must take continuing education to be eligible for registration renewal. New York State Education Law requires dentists to complete 60 contact hours of continuing education in each three-year registration period. Dental hygienists are required to complete 24 contact hours of continuing education during each three-year registration period. Dentists must complete 42 of the 60 contact hours required for a three-year registration via live courses. Dental hygienists must complete 14 of the 24 contact hours required for a three-year registration via live courses. The balance of remaining hours may be completed through appropriate self-study courses.

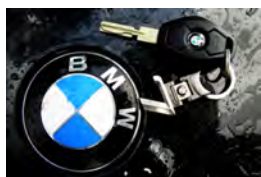

## Paperless Handouts

We will **not** print handouts in advance of the Buffalo Niagara Dental Meeting. We will provide course materials to access online for downloading. We will make handouts available for all courses for which we receive materials from the instructor. Attendees can go to [bndmeeting.com](http://bndmeeting.com) to print the handouts in advance of the meeting. Attendees can also go to the website to access handouts and other information before or during the Buffalo Niagara Dental Meeting.

## Exhibit Hall

Support our Exhibitors! Visit our Exhibit Hall displaying the latest and greatest in dental technology, equipment, and supplies for the dental profession. Exhibitors range from large national corporations to small local and regional suppliers. With the exception of exhibitors operating within their booth, no attendee may solicit business at the Buffalo Niagara Dental Meeting. Violation will result in expulsion.

**\*New this year!** A chance to win a weekend lease for a BMW from Towne BMW! Must get your "Car Pass" in your packets punched by 10 different exhibitors in order to qualify for the drawing on Friday, September 28, 2018 at 12pm!

## Show Specials

Exhibitor show specials will be emailed to attendees prior to the meeting. You may also download any of our social media apps for access to exhibitor booth numbers, specials, and announcements.

## Exhibit Hall Hours

Wednesday, September 26, 2018  
"Smile in the Aisle Party"

**FREE FOR EVERYONE**

**For complete course information and speaker biographies please visit [bndmeeting.com](http://bndmeeting.com)**

## 2018 CPR/AED for the Professional Rescuer

Wed, Sept. 26 | 3:00pm-6:00pm

Room 101-H

*\$60 additional registration fee*

3 CE hrs

Recommended for: Everyone

**Class is limited to 50 participants**

CPR / AED for the Professional Rescuer teaches students to respond to breathing and cardiac emergencies in adults, children and infants; use an AED on an adult or child victim of cardiac arrest; and use personal protective equipment to stop blood borne pathogens and other diseases from spreading. This course meets all New York State regulations for dental professionals.

Two-year CPR PRO / AED certification.

isafety Company is a premier, authorized Regional Training Center for the American Safety & Health Institute (ASHI), a nonprofit association of more than 35,000 professional safety educators and 5,500 training centers across the United States.

**2018  
Infection  
Control for  
The Dental  
Team**  
Frank C.  
Barnashuk,  
DDS '80

*Alumni Speaker Series*

Wed, Sept. 26 | 3:00pm-6:00pm

Room 101-D

*\$45 additional registration fee*

3 CE hrs

Recommended for: Dentists, Dental Hygienists and Dental Assistants

Infection Control cont.

Both patients and dental health care personnel can be exposed to pathogens and safety hazards in the dental working environment. Contact with blood, secretions, contaminated equipment and chemical and other physical hazards occur routinely. Following proper procedures can prevent the transmission of infections and occurrence of injuries in our daily working environment. Completion of the course enables you to obtain the NY State four-year training certificate required of all NY dentists and hygienists.

### Course Objectives:

- OSHA standards (BB Pathogens/HAZCOM)
- Core elements of NY State required training in infection control
- CDC guidelines including blood-borne pathogens and dental unit waterline management

## 2018 NYSDA Risk Management

Kevin Ricotta, JD and Frederick Wetzell, DDS

Wed, Sept. 26 | 3:00pm-7:00pm

Room 103

*\$95 additional registration fee*

3 CE hrs

Recommended for: Dentists

Risk Management cont.

Do you know: How long you are obligated to store patient records? What information needs to be included in a medical history? How to legally terminate a professional relationship with a patient? Answers to these and many other sometimes thorny legal questions are provided in the NYSDA Risk Management course.

A certificate will be issued to all participants who successfully complete the seminar. Dentists who complete this course will be entitled to a 10% discount on their liability premiums for a three- year period from the Medical Liability Mutual Insurance Company (MLMIC). Other companies also accept this course for a discount. Please check with your carrier.

Credits for NYSDA members will be automatically recorded with the NYSDA CE Registry. If you have not completed an approved risk management program within the past three years, it is necessary for you to take this course in order to continue to receive your discount.

## Opiate Overview & Narcan Administration

Wed, Sept. 26 | 4:30pm-5:30pm

Room 101-A

CE Credits: 1 CE hr

Recommended for: Everyone

### Course Objectives:

- The Opioid Epidemic in Erie County today – What happened?
- Signs and symptoms of an opioid overdose
- Good Samaritan Law
- ESAP and SEP
- Use of Narcan (Naloxene)
- Reporting and follow-up

**For complete course information and speaker biographies please visit [bndmeeting.com](http://bndmeeting.com)**

## **Oral Cancer: Who's at Risk and What About HPV?**

John R. Kalmar,  
DMD, PhD

Thurs, Sept. 27 | 9:00am-12:00pm  
Ballroom  
3 CE hrs  
Recommended for: Dentists, Dental Hygienists and Dental Assistants

This course will examine and discuss the conventional visual and tactile examination of the dental patient, with an emphasis on the clinical features of precancerous and cancerous lesions. Case-based examples will be used to emphasize high-risk settings and physical characteristics that can help distinguish worrisome lesions from other conditions. Current data on the relationship of human papillomavirus (HPV) infection with oral cancer and tonsillar cancer will be reviewed. The use of adjuncts in the detection and analysis of oral cancer and precancerous lesions will be discussed, including recently available saliva-based tests.

### **Course Objectives:**

- Review clinical evaluation of the dental patient
- Review current concepts of oral cancer and precancerous lesions
- Understand the scientific evidence behind devices as adjuncts in the detection of oral cancer

### **Practical Oral Pathology**

John R. Kalmar, DMD, PhD

Thurs, Sept. 27 | 1:30pm-4:30pm  
Ballroom  
3 CE hrs  
Recommended for: Dentists, Dental Hygienists and Dental Assistants

John R. Kalmar, DMD, PhD cont.

This course is designed to aid the dental professional with the detection, diagnosis and management of lesions and conditions encountered in daily practice. Case-based examples will be used to help participants recognize the signs and symptoms of common as well as significant oral diseases. Special emphasis will be given to: 1) skin lesions, 2) ulcerative conditions and 3) radiographic abnormalities. An interactive format helps to engage participants and reinforce current concepts in disease pathogenesis and treatment.

### **Course Objectives:**

- Review diagnostic features of skin lesions common to the face and neck
- Review clinical features of common conditions associated with oral ulcers and treatment options
- Review radiographic features of common oral pathologic conditions

## **Au Naturelle: Oral Health and Homeopathic Trends**

Lancette VanGuilder,  
RDH, BS

*Supported, in part, by  
an educational grant  
from Premier Dental.*

Thurs, Sept. 27 | 8:45am-11:45am  
Thurs, Sept. 27 | 1:15pm-4:15pm  
Room 106-A  
3 CE hrs (am) 3 CE hrs (pm)  
Recommended for: Everyone

Holistic and alternative medicine trends are on the rise. More and more people are seeking natural ways to feel better, improve their health and minimize the need for harmful chemicals and invasive procedures. The dental team has the opportunity to serve as a valuable resource for optimal oral and overall

Lancette VanGuilder, RDH, BS cont.

health. This course will provide background on natural healing practices, as well as, an overview of current oral and homeopathic trends and alternative medicine culture. After attending this course, the dental professional will be able to make personalized oral health recommendations based on knowledge, evidence and cultural awareness.

### **Course Objectives:**

- Understand cultural diversity in the dental setting
- Discuss research regarding alternative medicine trends
- Discuss current oral health and homeopathic trends
- Discuss oral health considerations for homeopathic populations

## **Your Image-Your Brand-Your Success!**

Janice Hurley

*Supported, in part, by an educational  
grant from CareCredit.*

Thurs, Sept. 27 | 8:45am-11:45am  
Room 101-C  
3 CE hrs  
Recommended for: Everyone

There is no denying that things have changed in dentistry and you have to keep up. Learn what it takes to put your best foot forward and make the first and lasting impression of your practice be the best impression. Learn about the science of body language, verbal skills and the power of visual impact. You will look at your social media footprint and your brand through your patient's eyes.

Janice Hurley cont.

Participants will walk away feeling inspired by the power of choice to impact their practice success.

Course Objectives:

- Develop skills in reading body language
- Learn effective voice tone and pace
- Promote positive visual images

**Clinical Etiquette. Be a Charismatic Success With Your Patients And Other Team Members**

Janice Hurley

*Supported, in part, by an educational grant from CareCredit.*

Thurs, Sept. 27 | 1:15pm-4:15pm

Room 101-C

3 CE hrs

Recommended for: Everyone

What are the top five ways we undermine ourselves with our patients and don't even know it? How do you talk about the social skills so necessary to a team's success without offending others? Janice will answer these questions and more as she walks you through the dos and don'ts of how to achieve that charismatic level of success for your practice.

Course Objectives:

- Increase team awareness
- Decrease misunderstandings and judgments towards ourselves and others
- Create a positive filter in which to help our patients
- Effectively use the science of voice tone and pace to give our patients hope

**"I Haven't Got Time for This Pain!"**

Thomas Viola, R.Ph., C.C.P.

Thurs, Sept. 27 | 8:30am-11:30am

Room 106-B

3 CE hrs

Recommended for: Everyone

Thomas Viola, R.Ph., C.C.P. cont.

Management of odontogenic pain may be accomplished through a clinical approach that successfully incorporates intraoperative local anesthesia and a postoperative regimen of non-opioid and opioid analgesics. However, improper and inappropriate use of local anesthetic agents and analgesics have the potential to produce adverse outcomes for both our patients and our communities. Thus, it is critical for clinicians to be able to accurately identify the need for pain control, individualize patient care, identify associated risks, and assess the efficiency of the local anesthetic and analgesic agents to be administered. This program will provide participants with an overview of local anesthetic agents and analgesics. Using case scenarios, special emphasis will be given to effective dental pain management and patient care planning strategies.

Course Objectives:

- Explain the pharmacology of non-opioid and opioid analgesics
- Discuss local anesthetic agents and vasoconstrictors with respect to clinical dental considerations
- Describe and assess techniques and strategies useful in developing individualized patient pain management plans
- Discuss appropriate prescribing practices for opioid analgesics

**"Un-Break My Heart"**

Thomas Viola, R.Ph., C.C.P.

Thurs, Sept. 27 | 1:00pm-4:00pm

Room 106-B

3 CE hrs

Recommended for: Everyone

Cardiovascular disease is one of the major diseases affecting adults in the U.S. While mortality from heart disease has been declining steadily recently, hospital admissions related to cardiovascular disease are on the rise, due, in part, to our aging population. This program will provide an overview of cardiovascular disease and the medications used in its

Thomas Viola, R.Ph., C.C.P. cont.

treatment. Using case scenarios, special emphasis will be given to developing patient management strategies essential for successful treatment planning and proper care of our medically complex dental patients.

Course Objectives:

- Discuss the family of cardiovascular diseases
- Review the classes of medications used in the treatment of hypertension along with their pharmacologic effects, adverse reactions and dental implications.
- Discuss the mechanism of action of anticoagulants and antiplatelet agents
- Describe the treatment modifications and care planning strategies recommended for dental patients with cardiovascular disease.

**Understanding Lasers: From The Science to Clinical Applications**

Scott D. Benjamin, DDS '78

*Alumni Speaker Series*

Thurs, Sept. 27 | 8:45am-11:45am

Room 101-B

3 CE hrs

Recommended for: Everyone

The number and applications of dental lasers on the market today is growing at an ever-increasing rate. The wide range of devices and applications for both hard and soft tissue as well as pain control and enhanced healing is leading to much confusion of the various roles that lasers may or may not play in today's dental practice. The goal of this program is to enhance the clinician's knowledge of the science of how lasers truly function; laser safety, tissue interaction, infection control, and ergonomics involved which is crucial for the successful implementation of laser technology into everyday dentistry.

Scott D. Benjamin, DDS '78 cont.

Course Objectives:

- Understanding of the true science of laser and light-based technologies.
- Understanding what applications and procedures can be routinely performed with a laser.
- The knowledge to understand the potential benefits laser and light-based technologies bring to oral healthcare and their practice.

**Experience The Functionality of Lasers in Today's Oral Healthcare Hands-On Workshop**

Scott D. Benjamin, DDS '78  
*Alumni Speaker Series*

Thurs, Sept. 27 | 12:15pm-4:15pm  
Exhibit Floor  
3 CE hrs  
Recommended for: Everyone  
Class is limited to 30 participants

**It is recommended to bring:**

- **Magnification eyewear (loupes)**
- **Any corresponding laser filters that one may have**

In this hands-on workshop participants will have the opportunity to look at, touch, feel, use, and compare a wide range of lasers and light-based technologies. It is designed to give attendees experience using many of these devices to perform various simulated everyday dental procedures as well as observing the interaction and functionality of the different types of lasers and light-based technologies being used by practitioners in today's oral health care. Attendees will have the opportunity during the program to perform several simulated dental procedures on porcine and other materials enabling the observation of the science and interaction light energy has on these materials.

Course Objectives:

- Experience the ergonomics and functionality of several of today's lasers and light-based devices
- Perform several simulated dental procedures on porcine and other materials to observe the science

Scott D. Benjamin, DDS '78 cont.

and interaction of light energy on these materials.

- Understand the potential benefits laser and light-based technologies bring to oral healthcare and their practice.

**Chairside Talk, Hot Topics in Dental Assisting**

Julie Varney, CDA,  
RDA, FAADOM,  
CDSO, CDSH

Thurs, Sept. 27 |

9:00am-12:00pm  
Room 101-D  
3 CE hrs  
Recommended for: Dentists

**Round Table Open Forum Style**

Chairside Buzz is a hot topic talk in dental assisting with an open discussion style. Dental assistants will be able to connect, learn, grow, and lead with other dental assistants that share their chair-side struggles. Learning the latest in technology advancements, agree to disagree through team harmony and improve patient hand-off and effective case presentation. As dental assistants play a vital role in creating a successful dental practice, why not take your career to the next level by growing your knowledge and skills? Why not be the BEST?

Course Objectives

- Learn about the latest in infection control, technology advancements
- Gain CE to further your career and enhance your time management
- Learn about team harmony – learn to agree to disagree
- Learn effective communication skills for your patient, doctor and team
- Learn to improve your patient hand-off and effective case presentation

**2018 Infection Control For The Dental Team**

Frank C. Barnashuk,  
DDS '80

*Alumni Speaker Series*

Thurs, Sept. 27 | 8:30am-11:30am  
Room 101-A  
\$45 additional registration fee  
3 CE hrs

Recommended for: Dentists, Dental Hygienists, and Dental Assistants

Both patients and dental health care personnel can be exposed to pathogens and safety hazards in the dental working environment. Contact with blood, secretions, contaminated equipment, and chemical and other physical hazards occur routinely. Following proper procedures can prevent the transmission of infections and occurrence of injuries in our daily working environment. Completion of the course enables you to obtain the NY State four-year training certificate required of all NY dentists and hygienists.

Course Objectives:

- OSHA standards (BB Pathogens/HAZCOM)
- Core elements of NY State required training in infection control
- CDC guidelines including blood-borne pathogens and dental unit waterline management

**2018 CPR/AED for the Professional Rescuer**

Thurs, Sept. 27 | 9:00am-12:00pm  
Room 101-H  
\$60 additional registration fee  
3 CE hrs

Recommended for: Everyone  
**Class is limited to 50 participants**

CPR / AED for the Professional Rescuer teaches students to respond to breathing and cardiac emergencies in adults, children and infants; use an AED on an adult or child victim of

CPR/ AED cont.

cardiac arrest; and use personal protective equipment to stop blood borne pathogens and other diseases from spreading. This course meets all New York State regulations for dental professionals.

Two-year CPR PRO / AED certification.

iSafety Company is a premier, authorized Regional Training Center for the American Safety & Health Institute (ASHI), a nonprofit association of more than 35,000 professional safety educators and 5,500 training centers across the United States.

**Building Your Empire:  
Pathway to Multiple  
Practice Ownership**  
Jason McKenzie &  
Chad Widensky

*This course is supported  
by an educational grant  
from Bank of America  
Practice Solutions.*

Thurs, Sept. 27 | 9:00am-12:00pm  
Room 103  
3 CE hrs\*  
Recommended for: Dentists

This program is designed to address concerns of dentists who are considering expanding beyond a single dental office. Have you determined the ideal business structure for your offices? Have you created a business plan that addresses the concerns of multiple practice ownership? Have you identified a team of experts to assist with your growth? If you are asking yourself these questions then join us to review the various aspects of multiple practice ownership. This presentation offers invaluable insight and information to help you ensure a successful leap from single to multiple practice ownership.

**Course Objectives:**

- Avoid the pitfalls of owning multiple practices

Bank of America cont.

- Discover what a lender looks for when qualifying an owner of multiple practices
- Determine the best methods to properly manage and organize your business

**Indirect  
Restorative  
Options and  
Predictable  
Cementation of  
Esthetic  
Restorations**

**Hands-On Workshop**

Shashikant Singh, BDS, MS

*This course is supported by an educational  
grant from Ivoclar Vivadent.*

Thurs, Sept. 27 | 9:00am-12:00pm  
Exhibit Floor  
3 CE hrs  
Recommended for: Dentists & Dental Assistants

With so many restorative materials and luting agents available, selecting an ideal combination of restorative material and cement can be overwhelming. This course highlights comparison of contemporary indirect restorative materials, and factors to consider during cement selection per clinical situations to maximize long-term performance. The course will also address possible reasons for clinical failure of the restorations. Learn correct "bonding" protocols and gain valuable tips to streamline shade selection and clean-up.

**Course Objectives:**

- Identify advantages and limitations of today's ceramic materials and cements
- Understand the principles of adhesion and how to select the ideal cement based on indication, prep design and type of restorative material
- Learn step-by-step procedures for delivering all ceramic restorations with confidence and success

**Cone Beam CT**  
Shawneen M.  
Gonzalez, DDS,  
MS

Thurs, Sept. 27 | 1:00pm-4:00pm  
Room 101-B  
3 CE hrs  
Recommended for: Everyone

The past couple of years several specialty groups have updated their recommendations as more research on cone beam CT (CBCT) has become available. This course will cover the latest CBCT recommendations and research including periodontics, endodontics and overall general use. These recommendations will assist dental offices in determining best uses of CBCT. The recommendations will be covered with interactive case reports.

**Course Objectives:**

- Understand and apply the latest recommendations regarding CBCT uses.
- Understand and apply the latest research on best uses for CBCT.
- Analyze and review guided CBCT cases using the latest recommendations and research.

**Meeting the  
Dental Needs of  
Patients with  
Dementia**  
Dr. Daniel  
Nightingale

Thurs, Sept. 27 | 1:00pm-4:00pm  
Room 101-D  
3 CE hrs  
Recommended for: Everyone

This presentation covers the clinical picture of neurocognitive disorders such as Alzheimer's disease and how they impact the individual; The CAR and Dementia Triangle as Models for ensuring a valued dental experience for the patient; environmental factors and simple changes that will have a positive impact on patients living with dementia visiting your office and activities and interactions you can make available in the office. This will

Dr. Daniel Nightingale cont.

be delivered through interactive sessions and Power Point.

#### Course Objectives

- Have an understanding of the main types of dementia
- Be able to assist in the reduction of anxiety and fear from reception to chair
- Learn to ask the most relevant questions at intake of a new patient with dementia
- Have an understanding of how our attitudes as clinicians impact the patient

**Bringing Implant Dentistry Into Your Dental Practice**  
Robert J. Buhite, DDS

Thurs, Sept. 27 | 1:00pm-4:00pm  
Room 101-A  
3 CE hrs  
Recommended for: Everyone

Clinical and administrative assessments of one's self, the dental practice team, as well as the practice's direction should be undertaken to begin and be successful in implant dentistry. Financial commitments when limiting one's self to implant restorative procedures compared to those for surgery and restorative procedures differ significantly.

Doctors and staff will gain an insight into basic diagnoses, treatment planning, attitude and philosophy to be successful, because implant dentistry is not a program, not a discipline, it is a journey.

#### Course Objectives:

- Criteria for patient selection
- Office personnel requirements
- How 2-D radiography can be adequate
- Patient maintenance in office and home
- Office design, equipment and instruments

### Complimentary Happy Hour for All Attendees!

Thursday, September 27th  
4:30pm-6:00pm

Exhibit Floor

**Free drink ticket available on Exhibit Floor night of event**

Visit with colleagues and exhibitors on the Exhibit Floor for an extended evening of fun!

## Parking

### FREE PARK AND RIDE SHUTTLE

Thursday, September 27 &  
Friday, September 28, 2018

**Sponsored by Patterson Dental**

- **Free to all pre-registered attendees**
- Park at Buffalo RiverWorks
- Shuttle buses to/from Buffalo Niagara Convention Center all day
- Free coffee station at Buffalo RiverWorks in the morning
- Drink & food specials at any Pearl Street Family Location with your BNDM Badge

### Here are some other parking alternatives:

- Park at UB South Campus on Main Street in the NFTA Lot ONLY and take the Metro Rail for a very low price
- Or arrive in downtown before 7:30 am and park in one of the ramps

## **The Fearful Dental Patient**

Larry J. Sangrik, DDS

Fri, Sept. 28 | 8:45am-11:45am  
Ballroom  
3 CE hrs  
Recommended for: Everyone

This course will establish the four distinct types of dental fear and how they impact a person's ability to accept dental treatment. Also discussed, will be the influence of an individual's underlying personality. A method to quickly assess these characteristics will be presented. Once a patient's dental fear assessment has been established, choosing the appropriate fear management technique will be presented. This course is applicable to both general dentists and specialists. It is ideal for both, practices offering complex, high-end treatment or routine care.

### **Course Objectives:**

- Learn the four types of dental fear.
- Understand how a patient's underlying personality impacts their decision-making process.
- Develop a method to quickly gain information about a patient's dental fears.
- Recognize the various methods to address a patient's fears.
- Identify which alternative best meets your patient's needs.

Larry J. Sangrik, DDS cont.

## **Medical Emergencies in The Dental Office: Why CPR Is Not Enough**

Larry J. Sangrik, DDS

Fri, Sept. 28 | 1:15pm-4:15pm  
Ballroom  
3 CE hrs  
Recommended for: Everyone

Medical emergencies occurring in the dental office can be stressful and frightening; not only for the patient, but also the entire dental team. Unfortunately, risk factors indicate that dentists are confronted during patient treatment by medical emergencies that are increasing in frequency, diversity and intensity. This course is designed for dentists and staff to develop strategies to prevent, identify and respond to medical problems including syncope, allergic problems, cardiovascular abnormalities, diabetes and respiratory distress. Emphasis will be placed on preparing the dental team in advance of a crisis to minimize its potential impact.

### **Course Objectives:**

- Understand the risk factors for medical emergencies faced by practicing dentists.
- Know the appropriate medications and equipment necessary to manage a medical event.
- Establish defined duties for each member of the dental team during a crisis.
- Recognize the signs and symptoms of the twelve problems dentists are likely to face.
- Establish algorithms to respond to each of the above twelve problems.

## **A Practical Approach to Oral Surgery for the General Dentist**

Lawrence Gaum, DDS, FADSA, FICD, FADI

*This course is supported, in part, by an educational grant from Dental Canada-Instrumentation.*

Friday, September 28, 2018  
8:30am-11:30am (3 CE hrs)  
1:00pm-4:00pm (3 CE hrs)  
Room 101-D  
Recommended for: Dentists

This course is designed for general dental practitioners who wish to learn additional oral surgical techniques and skills, and to be able to perform more surgery in their own offices. It is a presentation of numerous general surgical procedures that the dentist can and WILL confidently perform in the office when this seminar is completed. The course will demonstrate techniques that have been utilized and updated successfully for over 30 years. *It is important to emphasize that this seminar DOES NOT present major maxillofacial surgery such as osteotomies, fractures, condylectomies, rhinoplasties, etc. that are of no practical or clinical value to the GP. The surgical procedures that will be taught are the "Bread and Butter" variety, allowing the participant to refine and update all of their surgical skills.*

### **Course Objectives:**

- How to perform a proper examination, assessment and preparation of the patient.
- Selection of proper instruments to perform the various procedures.
- Surgical removal of Impacted 3<sup>rd</sup> molars: maxillary and mandibular.
- Surgical removal of erupted molars, erupted 3<sup>rd</sup> molars and retained roots.
- Surgical removal of hyperplastic tissue.
- Surgical removal of tori: torus mandibularis, torus palatinus.
- Selection and use of appropriate medications following surgery.

**Esthetic Dentistry  
Update:  
Materials &  
Techniques**

Gerard Kugel, DMD,  
MS, PhD

*This course is supported, in part, by an  
educational grant from Ivoclar Vivadent.*

Friday, September 28, 2018  
8:30am-11:30 am (3 CE hrs)  
Room 101-C  
3 CE hrs  
Recommended for: Dentists

As dentists, we rely not only on the materials but on our own ability to treatment plan and diagnose based on a multi-factorial situation. We must be careful in our preparation, design, and be meticulous in our bonding techniques. Failures in dentistry are frequently blamed on the materials. In reality: "user error" is often the culprit. In this seminar, Dr. Kugel highlights the latest information and evidence on a variety of esthetic dentistry related topics and clinical procedures. Aimed at dentists and their staff, this course will provide relevant clinical information to assist dentists in their everyday practice. Participants will learn: A comprehensive review of core principles of esthetic dentistry related to tooth form and function – tooth position, occlusal function. Most important, what you need to know to stay out of trouble. Why esthetics is secondary to proper function! All-ceramic options and cementation for indirect anterior and posterior restorations: What to do and when to use them. Digital impression making and chairside CAD/CAM - has its time finally come? Advances in adhesive and bioactive dentistry. Are the new generations all they are claimed to be? Esthetic case maintenance. You will get practical and cost effective information that you can use immediately in your practice.

**Course Objectives:**

- Dentist will learn the limitations of materials and what are the best

Gerard Kugel, DMD, MS PhD cont.

- options for different clinical situations.
- Dentist will learn the importance of understanding occlusion as it relates to their choice of materials.
- Dentist will learn the evidence as it related to new bonding systems.

**The Do's And Don't of Porcelain  
Laminate Veneers**

Gerard Kugel, DMD, MS, PhD

*This course is supported, in part, by an  
educational grant from Ivoclar Vivadent.*

Friday, September 28, 2018  
1:00pm-4:00pm  
Room 101-C  
3 CE hrs  
Recommended for: Dentists

Currently providing porcelain laminate veneers in your practice? Not having the esthetic success you hoped for? This course will provide an introduction into what you should consider when incorporating this treatment option, case presentations and a discussion of managing patients' expectations. From planning and consideration of alternative approaches to execution, the necessary steps are presented, and many practice tips are provided, to help participants efficiently achieve desired clinical results. This lecture will provide a comprehensive understanding to executing porcelain laminate veneers, including the most common problems and how to avoid these mistakes in your dental office.

**Course Objectives:**

- Understand the elements involved with treatment planning and case selection for veneers along with preparation tips.
- Overview of CAD/CAM veneer design and clinical cases.
- Discussion of the importance of team work and communication.
- Review of the tooth preparation options, when they are indicated for use.
- How to fabricate a temporary restoration on a prepared tooth.
- Review the proper techniques for cementation.

**Implants and  
Inflammation  
A Risky  
Association?**

David L. Cochran, DDS,  
MS, PhD, MMSci

*This course is  
supported, in part, by an educational grant  
from Straumann.*

**Robert J. Genco Distinguished Speaker  
Series**

Friday, September 28, 2018  
8:45am-10:15am  
Room 101-A  
Recommended for: Dentists

After 30 years of research, a lot has been learned about dental implants and how our patients react to them. The clinician has choices in what he/she uses, but those choices have consequences, and these risks are predictable. The mechanism for these consequences involve inflammation and bone metabolism and these will be discussed.

*2<sup>nd</sup> part after break*

**Bone Regeneration and  
Biological/Clinical Requirements**

Friday, September 28, 2018  
10:30am-11:45am  
Room 101-A  
3 CE hrs  
Recommended for: Dentists

Bone regeneration is highly dependent on the specific clinical indication. This lecture will examine the biological/clinical requirements for osseous regeneration and discuss therapeutic strategies for the different indications.

**Course objectives:**

- The participant will learn that the host tissues react predictably around dental implants.
- The practitioner has many choices to make when using implants.
- The choices that a practitioner makes in regards to dental implants has consequences.

**Dispelling The “CSI Effect” Myth, an Overview of Contemporary Forensic Dentistry**

Anthony Cardoza, DDS, D-ABFO

Friday, September 28, 2018

8:45am-11:45am

Room 106-A

3 CE hrs

Recommended for: Everyone

Because of the current popularity of forensic faire in television, the general public is getting a skewed view of the true nature of forensic investigation. This issue is commonly known as the “CSI effect.” In this seminar, Dr. Cardoza will dispel this myth as it relates to forensic odontology. Topics will include forensic dental identification of decedents of varying post-mortem states including: skeletal, fragmented, decomposed, burned remains and pattern injuries as they relate to bite mark investigation not only in human bites but animal bites as well.

**Course Objectives:**

- Learn the varied roles of forensic dentists.
- Understand the forensic value of dental records.
- Recognize how to cooperate with the legal system.

In this presentation, Dr. Cardoza does not refer to products of a commercial company with which he has a significant relationship.

**Dentistry’s Role in a Mass Disaster Scenario**

Anthony Cardoza, DDS, D-ABFO

Friday, September 28, 2018

1:15pm-4:15pm

Room 106-A

3 CE hrs

Recommended for: Everyone

Dr. Cardoza will discuss the evolution of mass disaster management from a perspective of forensic dentistry. This course is intended to acquaint the dental community with the procedures forensic dentists utilize in identifying decedents specifically in a

Anthony Cardoza, DDS, D-ABFO cont.

mass disaster such as plane crashes, wild fires, hurricanes, and terrorist events seen in both regional, national or international incidents.

**Course Objectives:**

- Learn dentistry’s potential role in a mass disaster.
- Recognize the use of dental records in a mass disaster.
- Understand the role of the forensic dentist in a mass fatality.

**Navigating The Mystery of EOB’S – Keep Revenue in Your Office**

Colleen Huff, FAADOM

*This course is supported, in part, by an educational grant from CareCredit.*

Friday, September 28, 2018

9:00am-12:00pm

Room 101-B

3 CE hrs

Recommended for: Office Staff and Dentists.

Explanation of benefits are confusing and difficult to understand. Team members are often unaware of how to interpret the explanation. I will take the mystery out of your EOB’s (explanation of benefits). How we track and enter revenue is essential to the success of a practice. Insurance Coordinators collect what the office produces and no one wants to work for free. This seminar will clarify terms and make sure you are collecting every bit of what you produce.

**Course Objectives:**

- Terminology
- Adjustments – What do you really need to adjust?
- Denials – how to appeal
- Coordination of benefits – regular and non-duplication plan understanding
- Interactive – review of actual EOB’s with Q & A
- Trends in dental insurance

**Safety and Simplicity in Root Canal Instrumentation: Myths, Metal and Motion**

Anne L. Koch, DMD

**Lecture and Hands-on Workshop**

*This course is supported, in part, by an educational grant from Real World Endo.*

Friday, September 28, 2018

9:00am-12:00pm

Exhibit Floor

3 CE hrs

Recommended for: Dentists

Nearly 25 years after the introduction of nickel titanium rotary instrumentation to endodontics, we’ve learned much about the clinical strengths and limitations of these great instruments. With recent improvements in metallurgy, enhanced designs, and innovative rotary file motions, we need to understand how these changes affect clinical instrumentation. Furthermore, we must take advantage of these improvements to create an instrumentation protocol that combines safety with simplicity! In this presentation, a new reciprocating technique will be introduced that will result in safe, efficient instrumentation for all root canal types. After attending this presentation, be ready to improve your instrumentation predictability while dramatically reducing instrument separation. The hands-on session will be conducted using blocks.

**Course Objectives:**

- How rotary file design features influence instrumentation safety and efficiency.
- Discover the most effective instrument motions available for shaping root canals and their advantages and limitations.
- Completely understand the need to utilize piezoelectric ultrasonics in both access and three-dimensional irrigation.
- The benefits of bioceramic obturation and the incorporation of matching posts.

**Hi Tech Dental  
Hygiene 2018  
An Update on  
Technology in The  
Dental Office**

Connie Kugel,  
RDH, BS

*This course is supported, in part, by an  
educational grant from Philips.*

Friday, September 28, 2018  
9:00am-12:00pm  
Room 106-B  
3 CE hrs  
Recommended for: Hygienists

Technology in the dental office is constantly changing. Don't be left behind! This course reviews some of the most recent technological advances in dentistry. Topics include new technologies and updates in patient treatment, prevention, and restorative maintenance. We'll discuss new restorative materials, silver diamine fluoride, CBCT, polishing, implant care, lasers, whitening, and more to keep dental hygienists up to date!

**Course Objectives:**

- Discover selected advances in technology available in dental offices and how they can benefit patients and dental practices (CBCT, CAD/CAM, lasers & more)
- Discuss new restorative materials and how to maintain these restorations
- Understand advances in preventive materials and how they can be utilized in patient care
- Learn about advances in adjunct services including whitening
- Review dental polishing of esthetic dental materials and identify considerations before beginning

**Varnishes – Fluoride and More –  
Understanding Varnish Technology  
Beyond Fluoride**

Connie Kugel, RDH, BS

Friday, September 28, 2018  
1:30pm-4:30pm  
Room 106-B  
3 CE hrs  
Recommended for: Hygienists

This course includes a review of the science behind the use of dental varnishes, studies, ADA position, dental

Connie Kugel, RDH, BS cont.

insurance coding, procedures and more. Learn when, why and how to place dental varnishes as well as information to help with varnishes choices that work for you and your patients. Fluoride varnish will be covered of course AND additionally we will discuss several other types of varnish as well. Learn how varnish technology has expanded to non-fluoride caries prevention, sensitivity, esthetics, and more, so you can make informed decisions for your patients.

**Course Objectives:**

- Discover the science behind the shift to varnishes in dentistry
- Understand ideal varnish characteristics of varnish and different types available
- Discuss which patients are appropriate to treat with varnishes
- Learn about non-fluoride varnishes now available that can benefit you and your patients

**Mastering the  
Mouthgard**

Jeffrey I. Goldberg,  
DDS '03

*Alumni Speaker Series*

Friday, September 28, 2018  
1:00pm-4:00pm  
Room 101-A  
3 CE hrs  
Recommended for: Everyone

When patients suffer daily with headaches, jaw pain, or poor sleep, there are a lot of treatment options to consider. A mouthguard, or oral orthotic, can have tremendous impact, and we as dental professionals are the only ones to provide it. In this program, we talk about selecting the right orthotics for a variety of conditions, including TMJ disorders, bruxism, sleep apnea and snoring, medication delivery, athletics, and cosmetics. We look at the science behind why they work and the design elements essential for success. We will discuss the fabrication of orthotics, either on your own or with a dental lab, touching on emerging technologies like 3D printing, and expand on how the mouthguard fits into a total treatment plan. This presentation is for any dentist or team

member interested in enjoying greater satisfaction with one of the most rewarding, safest, and least stressful areas of dentistry.

**Course Objectives:**

- Select an appropriate orthotic for a given condition
- Ensure that the orthotic is made right
- Manage the orthotic therapy component of a larger treatment Plan

**Solving the Nightmare  
of HIPAA Liability in  
Digital**

**Communications**

Scott D. Benjamin,  
DDS '78

*Alumni Speaker Series*

Friday, September 28, 2018  
1:00pm-4:00pm  
Room 101-B  
3 CE hrs  
Recommended for: Everyone

This interactive program will clarify and demonstrate the various methods of HIPAA compliant digital communication available today. The types of digital files and information that need to be shared today include CBCT files and other digital radiographic and photographic images, as well as text documents. The goal of this presentation is to enable the attendees to simply and securely send and receive all the necessary digital information with all their patients, colleagues, labs, and other interested parties in a HIPAA compliant manner. The pros and cons of each type of communication will be discussed including the use of removable media, secure portals, secure email and direct messaging (DirectTrust). Additionally, attendees will learn how to assist their patients and referring clinicians on how to communicate in an appropriate HIPAA compliant secure manner.

**Course Objectives:**

- Understand the HIPAA regulations and requirements for digital/electronic communication.
- Know the various methods of HIPAA compliant communication available.
- Understand the pros and cons of each of the various methods of HIPAA compliant communication available.

## Frequently Asked Questions

### Can I register on-site if I didn't pre-register?

Yes! Onsite registration is on Wednesday, September 26, 2018 from 2:00pm – 7:00pm, Thursday, September 27, 2018 from 7:30am – 4:00pm and Friday, September 28, 2018 from 7:30am – 1:00pm at higher prices.

### If I pre-registered do I receive free parking and where?

Yes! If you pre-registered you receive FREE parking at Buffalo RiverWorks, 359 Ganson St, Buffalo, NY 14203.

### What is include in my pre-registration fee?

Access to obtain up to 12 CE credits Wednesday, September 26-Friday, September 28, 2018, access to exhibit floor all three days, opportunity to enter to win a weekend lease for a BMW, and a drink ticket for Thursday, September 27, 2018 Happy Hour on exhibit floor from 4:30pm-6:00pm.

### What will I receive in the mail if I pre-register?

If you pre-register before September 13, 2018, you will receive your badge that you **MUST** bring with you to the meeting for access to walk around the exhibit floor and attend lectures.

### What do I do if I lose or forget my badge?

We ask again that you **PLEASE** bring your badge with you that was mailed but if you do forget it or lose it, come to the Duplicate Badge area in the lobby and one of our team members can make you another.

### If I have questions regarding the Buffalo Niagara Dental Meeting who do I contact?

Call the UB Dental Alumni office at (716) 829-2061.

### Where do I find the Buffalo Niagara Dental Meeting on social media?

Facebook Event-Buffalo Niagara Dental Meeting  
Twitter- @bndentalmeeting  
LinkedIn- Buffalo Niagara Dental Meeting  
Instagram- BNDentalMeeting

### What is the cancellation policy?

Cancellation requests must be received before September 13, 2018. All approved refunds are subject to a \$25 processing fee. No refunds will be made for cancellations requested after September 13, 2018.

### How do I receive CE credit for events I attend?

One CE Verification Form will be included in your registration packet for **ALL** lectures you attend throughout the meeting. Complete the verification form as you attend lectures, including course titles, instructor's name, and verification numbers. Submit the top copy of the verification form WHEN YOU COMPLETE YOUR LAST COURSE. Keep bottom/carbon copy for your records. This is your only record of attendance. Collections boxes are located in the convention center lobby. CE Verification Forms **MUST** be submitted at the convention center and will not be accepted at the university after the meeting.

### Can I bring my spouse if she/he is not in the dental profession?

Yes! Guests of dentists are offered guest passes at no charge. Guests cannot be in the dental field and are **not** eligible for CE credit.

### I do not need CE and I just want to visit the exhibit hall, what can I do?

Wednesday, September 26, 2018 is FREE for everyone from the hours of 5:30pm-8:00pm. Come see the latest in dental technology while enjoying music, cocktails, and light food.

### Where do I get my handouts?

All handouts that were sent by the speakers will be available online at bndmeeting.com. Printed handouts will not be available onsite.

*The Buffalo Niagara Dental Meeting is proudly sponsored by the:*

University at Buffalo

Dental Alumni Association

School of Dental Medicine

The UB Dental Alumni Association strives to provide a link between our members and the School of Dental Medicine, to support student activities, and to improve the quality of student life. Today's students are tomorrow's alumni and the Dental Alumni Association is proud to support our future colleagues.

If you would like to join the Executive Council, become more involved in the UB Dental Alumni Association or be a future alumni speaker at the Buffalo Niagara Dental Meeting, please call (716) 829-2061 or e-mail Sherry Szarowski at [ss287@buffalo.edu](mailto:ss287@buffalo.edu).

#### ALUMNI SPEAKER SERIES

The purpose of the Alumni Speaker Series is to feature prominent alumni of the UB School of Dental Medicine who have distinguished themselves as dental professionals and lecturers. Each year during the Buffalo Niagara Dental Meeting, alumni are invited back to their alma mater to share with us their unique treatment techniques. Please join us as we welcome back to UB our distinguished alumni speakers.

# new couch & new crown

## With CareCredit, patients don't have to choose.

When dental needs require an out-of-pocket investment, patients may think they have to choose family priorities or recommended treatment. Happily, you accept the CareCredit healthcare credit card, so patients can pay monthly and take advantage of promotional financing,\* helping to make it easier for them to enjoy a new couch AND a new crown.

**Visit booth #135 at the Buffalo Niagara Dental Meeting 2018 to learn how CareCredit may be able to help you reach your practice goals.**

\*Subject to credit approval.

 **CareCredit**<sup>®</sup>  
Making care possible...today.
