WELCOME!

Here we are at the 45th Annual Buffalo Niagara Dental Meeting (BNDM), November 2-4, 2022! After the uncertainty of last year's meeting on the tail end of the pandemic, we are happy to say we are back STRONGER than ever.

Welcome assistants, welcome staff, welcome hygienists, welcome dentists, welcome academics, speakers, visitors, sponsors and vendors. We're so happy to see all of you. Our goal is to provide affordable, high-quality CE, LIVE and IN-PERSON! Your 2.5-day experience allows you to collect those coveted CE credits, interact with your colleagues outside the typical work setting and for some of you - reunite with classmates from dental school.

We appreciate the local offices who use this opportunity to provide invaluable team building. This year's Wednesday evening is affectionately called our "Staff Appreciation Night". We know what you've been through the last 2 years, and this certainly is a great time to recognize and celebrate all of you. Dental staff, you mean the world to our dental community, and we want to make sure you know it!

This marks the 5th year of FREE parking at Buffalo Riverworks for all pre-registered attendees. Don't trouble yourself with expensive downtown parking or walking in unfavorable weather. Hop on our Door-to-Door Shuttle Bus for a quick ride with no hassles, sponsored by Patterson Dental.

Following Thursday's programs, Happy Hour on the Exhibit Floor, sponsored by Vital Dental Lab and WNY Dental Group, is open to all. Grab a complimentary drink and snack while catching up with friends and colleagues. This is a great time for your office purchases with our vendors.

Thank you to Dean Stefan Ruhl, students, faculty and staff at the University at Buffalo School of Dental Medicine for your continued support and recognition of the importance of the Buffalo Niagara Dental Meeting. You've also been welcoming of our visitors to the Queen City and Niagara Region. Colleagues leave our meeting with praise for how efficiently our programing runs.

Of course, the greatest appreciation goes to our sponsors at every level. Without your support we could not provide the nationally recognized speakers, facilities and the stage for alumni engagement and networking. Thank you and enjoy another successful Buffalo Niagara Dental Meeting!

Sincerely,

Genene Crofut, DDS '03
President, UB Dental Alumni Association

2022 Registration Fees

Registration Type	Before Oct. 20	After Oct. 20

GENERAL INFORMATION

Cancellation Policy

Cancellation requests must be received by October 20, 2022. All approved refunds are subject to a \$25 processing fee. No refund or cancellation requests will be accepted after October 20, 2022.

Mandatory Breaks

There will be mandatory morning and afternoon breaks during the Buffalo Niagara Dental Meeting courses. Please take this time to visit our exhibitors.

Course Disclaimer

The Buffalo Niagara Dental Meeting's committee makes every effort to present high-caliber clinicians in their respective areas of expertise. The presentations of the instructors in no way imply endorsement of any product, technique or service presented in the courses. All participants are cautioned about the risks of using new techniques, especially in courses that have not provided them with supervised clinical expertise.

CE Credit Verification Forms

*One CE Verification Form will be included in your registration packet for ALL lectures you attend throughout the meeting.

*Complete the verification form as you attend lectures, including course titles, instructor's name, and verification codes.

*Submit the top copy of the verification form WHEN YOU COMPLETE YOUR LAST COURSE. Keep bottom/carbon copy for your records. This is your only record of attendance. Collection boxes

are located in the convention center lobby. CE Verification Forms MUST be submitted at the convention center and will not be accepted after the meeting.

ADA CERP

University at Buffalo Continuing Dental Education is an American Dental Association CERP Recognized Provider.

ADA CERP is a service of the ADA to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at: ADA.org/CERP.

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between the UB Continuing Dental Education Department and the UB Dental Alumni Association. UB CDE is an approved sponsor for NYS and verifies at least one full-time employee and the facilities, equipment, financial and physical resources to provide such programs as required by NYS Education Law. Some courses may not be acceptable for New York State mandatory continuing education credit. Other organizations (AGD, ADHA, DANB, etc.) have different requirements for acceptable continuing education courses. Please submit copies of your CE credit form to those organizations

when needed. Direct specific questions regarding CE Credits to the University at Buffalo, Office of Continuing Dental Education at: (716) 829-2320.

NY CE Reporting Period

Every dentist and dental hygienist registered to practice with a New York State License must take continuing education to be eligible for registration renewal. New York State Education Law requires dentists to complete 60 contact hours of continuing education in each three-year registration period. Dentists must complete 42 of the 60 contact hours required for a three-year registration via live courses. Dental hygienists must complete 14 of the 24 contact hours required for a three-year registration via live courses. The balance of remaining hours may be completed through appropriate self-study courses. All credits can be virtual through January 1, 2023 due to COVID.

Photo Disclaimer

By consenting to having your photo taken you therefore grant and authorize the right to edit, alter, copy, exhibit, publish, distribute and make use of any and all pictures and videos of you to be used in and/or for legally promotional materials including, but not limited to: newsletters, flyers, posters, brochures, advertisement, fundraising letters, annual reports, press kits and submissions to journalists, websites, social networking sites and other print and digital communications, without payment or any other consideration. This authorization shall continue indefinitely, unless you otherwise revoke said authorization in writing.

Paperless Handouts

We will not print handouts in advance of the Buffalo Niagara Dental Meeting. We will provide course materials to access online for downloading. Attendees can go to: bndmeeting.com to print the handouts in advance of the meeting. Attendees can also go to the website to access other information before or during the Buffalo Niagara Dental Meeting.

Exhibit Hall

Support our Exhibitors! Visit our Exhibit Hall displaying the latest and greatest in dental technology, equipment and supplies for the dental profession. Exhibitors range from large national corporations to small local and regional suppliers. With the exception of exhibitors operating within their booth, NO attendee may solicit business at the Buffalo Niagara Dental Meeting. Violation(s) will result in expulsion.

Show Specials

Exhibitor show specials will be emailed to attendees prior to the meeting. You may also download any of our social media apps for access to exhibitor booth numbers, specials and announcements.

2022 CPR / AED FOR THE PROFESSIONAL RESCUER

iSafety Company

Wed., Nov. 2, 2022
2:30pm - 5:30pm
(3 CE hrs)
Room 101-H

Repeated:

Thurs, Nov. 3, 2022
9:00am - 12:00pm (3 CE hrs)
Room 101-H

*\$60 additional registration fee required -
Limited to 50 participants in each program.*

CPR / AED for the Professional Rescuer teaches students to respond to breathing and cardiac emergencies in adults, children and infants; use an AED on an adult or child victim of cardiac arrest; and use personal protective equipment to stop blood borne pathogens and other diseases from spreading. This course meets all New York State regulations for dental professionals.

Two-year CPR PRO / AED certification is provided.

iSafety Company is a premier, authorized Regional Training Center for the American Safety & Health Institute (ASHI), a nonprofit association of more than 35,000 professional safety educators and 5,500 training centers across the United States.

iSafety Company is not associated with, employed by, nor consults for, any manufacturer, supplier or retailer of dental instruments or materials.

Recommended for: Everyone

HOT TOPICS IN INFECTION CONTROL & SOME COOL TIPS

Nancy L. Dewhirst, RDH, BS

Wed., Nov. 2, 2022
2:30pm - 5:30pm (3 CE hrs)
Room 101-B

\$45 additional registration fee required

Update and review the most important clinical safety issues since COVID-19 fundamentally changed dental infection control. This class gives you a "Hit List" of the hottest safety topics and the most important things to do! Optimize the most effective strategies to apply laws and guidelines that manage safety challenges, including bloodborne, droplet, contact & aerosol transmitted diseases (ATDs) and evolving / resistant pathogens. Meet your state CE requirements and get some cool tips for these hot topics!

Course Objectives:

- Review basic infection prevention science
- Prioritize safety strategies that are the most effective
- Update safety standards for bloodborne, contact, droplet and airborne diseases
- Manage biofilms and plan for related health concerns

Recommended for: Everyone

OPIOID UPDATES AND NARCAN USE: RESPONDING TO AN OPIOID OVERDOSE - LEARN TO SAVE A LIFE

Cheryll Moore, BSN, CHN

Wed., Nov. 2, 2022
4:00pm - 5:30pm (1.5 CE hrs)
Room 101-A

Course Objectives:

- The Opioid Epidemic in Erie County today - What happened?
- Signs and symptoms of an opioid overdose
- Good Samaritan Law
- ESAP and SEP
- Use of Narcan (naloxone) to reverse an overdose
- Reporting and follow-up

Recommended for: Everyone

CIVILIAN RESPONSE TO AGGRESSIVE DEADLY BEHAVIOR

Captain James McNamara

Wed., Nov. 2, 2022
4:00pm - 5:30pm (1.5 CE hrs)
Room 101-C

This presentation is applicable to any person who works in (whether consistently or periodically), or is visiting a space which can be accessed by someone intent on doing harm including:

- Dentists
- Hygienists
- Dental Assistants
- Office Staff

At the completion of the presentation, participants will understand the importance of and how to conduct:

- Greeter Evaluation
- Structure Strengthening
- Lockdown, Lockout, Shelter in Place, Evacuation
- Run, Hide, Fight
- Training Induced Trauma

The information presented is supported by trainings & publications from:

- NYS Education Dept. (Safe Schools Act)
- NYS Division of Criminal Justice
- National Center for Security & Preparedness

Recommended for: Everyone

HONORING AND CELEBRATING THE LIFE OF DR. NORMAN MOHL

Wed., Nov. 2, 2022
4:00pm - 5:30pm
Room 101-A

Dr. Norman Mohl earned his dental degree from the University at Buffalo in 1956. After serving as a Dental Officer in the US Navy and running a successful practice in Buffalo, he dedicated his life to academia, achieving the rank of SUNY Distinguished Service Professor.

He was a leader in dentistry and his superb vision in dental education inspired the development of key programs in the School of Dental Medicine, most notably, the Master of Oral Sciences Program and the Postdoctoral Training Program in TMD and Orofacial Pain. As exceptional as his academic brilliance was, his outstanding kindness and respect for others was unmatched.

Dr. Mohl promoted and supported the academic careers of many faculty members not only in his academic home, the Department of Oral Diagnostic Sciences, but throughout the School of Dental Medicine.

We will now take this opportunity to once again recognize and celebrate Norm's footprint in our School, in dental education and in the many ways he impacted our lives. He will always be present in our hearts.

For complete course information and speaker biographies, please visit: bndmeeting.com

Thursday, November 3, 2022

EFFECTIVE ASSISTING IN THE MODERN PRACTICE

Timothy M. Bizga, DDS, FAGD

Thurs., Nov. 3, 2022
8:30am - 11:30am (3 CE hrs)
Room 101-B

This course is supported, in part, by educational grants from GC America and Premier Dental.

This course is designed to teach dental assistants and EFDA's the skills necessary to better support their dentists in the everyday routines associated with a general dental practice. A lecture-based program, coupled with everyday practice essentials is the basis of this class. The topics covered will include basic material science, procedural protocols, and topics related to patient care and treatment.

Course Objectives:

- Learn how to achieve employment security in a no-job-security world
- Learn basic material science principles
- Discuss key concepts in restorative procedures
- Review digital and analog impressioning
- Discuss temporary fabrication, material selection and shade selection
- Define importance of patient communication

Recommended for: Dental Assistants

UNLEASHING THE POWER OF THE 89%: HOW SUPERCHARGING YOUR HYGIENE PROGRAM IS BENEFICIAL

Timothy M. Bizga, DDS, FAGD

Thurs., Nov. 3, 2022
1:00pm - 4:00pm (3 CE hrs)
Room 101-B

This course is supported, in part, by educational grants from GC America and Premier Dental.

With a recent revelation that 89% of a patient's overall dental experience is spent at hygiene visits, current beliefs hold that tiny tweaks surrounding this key patient experience can have huge benefits. This course is designed to provide informational "gold" on dental topics essential to seeing long term success and financial growth. From understanding patient decision making, to the tools and select tips for longer lasting dentistry, this course is designed to give a practical, "soup-to-nuts" approach to the latest research and materials, with special emphasis on the hygiene appointment.

Course Objectives:

- Learn current trends in today's general practice

- Talk common sense, "real-world" approach to treatment planning and the benefits of "Co-Diagnosis"
- Reinforce the value of great doctor-hygienist communication and team dynamics

Recommended for: Everyone

IT'S (MEDICALLY) COMPLICATED!

Thomas A. Viola, R.Ph., CCP, CDE, CPMP

Thurs., Nov. 3, 2022
8:30am - 11:30am (3 CE hrs)
Room 106-A

Dental professionals must frequently draw upon their knowledge of pharmacology for optimal care of today's medically complex dental patients. However, armed with relatively brief exposure to such a vast subject during formal education and faced with ever-changing medication therapy guidelines, many dental professionals simply cannot keep up with the latest trends in disease state management. This program will provide an overview of the dental implications of the prescription medications, non-prescription medications, herbal products, nutritional supplements and substances of abuse most frequently used by patients. Special emphasis will be given to delivering this essential information in a format which makes it practical and useful for all members of the dental team.

Course Objectives:

- Identify the prescription medications most frequently encountered on a patient's medical history and discuss their indications for use, adverse reactions and impact on dental therapy
- Discuss the non-prescription medications most often used by dental patients and explain their impact on dental therapy, including situations which preclude their use
- Identify the most popular herbal products and nutritional supplements and discuss their purported uses and dental considerations
- Identify the most common substances of abuse and describe their oral manifestations and dental treatment considerations

Recommended for: Everyone

HURTS SO...SWELL!

Thomas A. Viola, R.Ph., CCP, CDE, CPMP

Thurs., Nov. 3, 2022
1:00pm - 4:00pm (3 CE hrs)
Room 106-A

Management of acute odontogenic pain is accomplished through a clinical approach that successfully incorporates both opioid and non-opioid analgesics. It is critical for dental

clinicians to not only employ appropriate prescribing practices when utilizing opioid and non-opioid analgesics to treat pain but to also apply best practices when assessing pain control and educating patients on opioid-associated risks and opioid safety. This program will provide an overview of techniques for effectively assessing and managing dental pain, appropriately prescribing analgesics, educating patients on adverse effects and proper handling of opioid medications, as well as strategies for identifying patients at risk for substance abuse, and counseling patients on agents used in the management and treatment of opioid use disorder.

Course Objectives:

- Describe the pharmacology and mechanism of action of opioid and non-opioid analgesics
- Explain the intended role of opioid and non-opioid analgesics in the management of acute dental pain, as well as situations which may preclude their use, based on a patient's underlying medical conditions
- Discuss appropriate prescribing practices for opioid analgesics to utilize in everyday clinical situations
- Describe techniques useful in developing individualized pain management plans as well as strategies useful in identifying potential opioid addiction and counseling on treatments

Recommended for: Everyone

BURNOUT, MORAL DISTRESS & WELL-BEING IN DENTISTRY

Brandon DeWitt, DDS '07, MS, DABP

Thurs., Nov. 3, 2022
8:45am - 11:45am (3 CE hrs)
Room: 101-A

Alumni Speaker Series

This presentation will improve your understanding of the symptoms of work-related burnout and how it may adversely affect your work-life, patient care, and the profession of dentistry. It will provide context for understanding these concepts and discuss how personality traits may predispose and protect against burnout. Research supported concepts for reducing burnout will be reviewed. Moral distress will also be discussed as a concept for understanding the experience of dental team members when their patient care perspective is marginalized or they cannot practice according to their professional values.

Course Objectives:

- Improve comfort for discussing differences in personality and values
- Recognize symptoms of work-related burnout

For complete course information and speaker biographies, please visit: bndmeeting.com

Thursday, November 3, 2022

- Recognize aspects of healthy work engagement
- Discuss ways to measure and reduce burnout
- Understand how moral distress emerges in work and how to reduce it
- Improve patient care and outcomes by recognizing and reducing burnout

Recommended for: Everyone

TAKE CONTROL: MAXIMIZE THE SCHEDULE, OPTIMIZE PRODUCTIVITY

Laura Nelson, BS, MS, FAADOM

Thurs., Nov. 3, 2022
8:45am - 11:45am (3 CE hrs)
Room 106-B

This course is supported, in part, by educational grants from CareCredit and Plan Forward.

The schedule in a dental office impacts everyone – the clinical team, the front office team and even your patients. Understanding how to create and maintain a productive schedule is key to better teamwork, happier patients and a less stressful environment. This scheduling presentation will help you discover new and innovative ways to be proactive rather than reactive to your schedule and help impact your daily routine in a positive and productive way and contribute to the ultimate customer service experience for your patients.

Course Objectives:

- Design a productive schedule that impacts the team
- Solve the issues with no shows & cancellations that impact the schedule
- Formulate scheduling policies that impact & benefit your patients and your team
- Produce a schedule that impacts & creates an exceptional patient experience

CLOCKED-IN: MAKE EVERY MINUTE MATTER

Laura Nelson, BS, MS, FAADOM

Thurs., Nov. 3, 2022
1:15pm - 4:15pm (3 CE hrs)
Room 106-B

This course is supported, in part, by educational grants from CareCredit and Plan Forward.

Understanding "the why" and the purpose behind time management is the first step to keeping your practice organized and efficient. Learning and implementing good time management skills can increase practice

productivity and helps to create a productive and positive work environment. A practice that is well organized and team members that balance their time well, will have better communication among the team and work more efficiently. Having time management and organization skills are key to creating an environment in which team members thrive and patients appreciate. This allows for a less stressful work environment and the ability to offer the best care for patients.

Course Objectives:

- Discuss "the why" and the importance of time management in the dental practice
- Recognize the importance of morning huddles and meetings

- Examine the keys to effective time management
- Identify barriers to effective time management

Recommended for: Everyone

SMILE MAKEOVERS: TREATMENT PLANNING TO FINAL CEMENTATION

Nada Albatish, DDS, FAGD

Thurs., Nov. 3, 2022
Part I - 9:00am - 12:00pm (3 CE hrs)
Part II - 1:30pm - 4:30pm (3 CE hrs)
Ballroom

This course is supported, in part, by an educational grant from Ivoclar Vivadent, Inc., QuickSprint and Advanced Dental Designs.

Smile makeovers are the part of your restorative practice that can bring in patients from near and far looking for cosmetic enhancements. Learning aesthetic dentistry is not just about how to do it, rather understanding the why behind the protocols is critical to your success as you embark on this journey. Our goal as clinicians is to provide our patients with optimal aesthetics and longevity, and we do this by understanding the role comprehensive care and function in our aesthetic cases. In this program, Dr. Albatish simplifies the thought process behind the key parts of smile makeovers from your first contact with the patient, through treatment planning to final cementation and case finishing. This course will provide the key concepts in each category, and you will be sure to take home pearls you can implement in your practice immediately.

Course Objectives:

- Optimize patient communication between team and patients seeking high value treatment
- Recognize high risk functional and cosmetic patients before you proceed with treatment
- Treatment plan using key smile design concepts for predictable aesthetics

- Recognize appropriate use of analog vs. digital records
- Tips and tricks for handling complications so you can proceed to complete the case successfully
- Understand how to efficiently prepare and temporize aesthetic cases and how it differs from conventional techniques
- Understand modern materials selection and adhesive cementation procedures for aesthetic cases
- Learn how to finish the occlusion for your aesthetic cases to help your dentistry last

Recommended for: Everyone

HYGIENE DETECTIVE

Amber Auger RDH, MPH

Thurs., Nov. 3, 2022
9:00am - 12:00pm (3 CE hrs)
Room 101-C

This course is supported, in part, by educational grants from GC America, Orascope and Waterpik.

There are many clues that provide evidence of disease, such as occlusal wear, recession, bleeding, fissured tongues, erythemic tissues, incipient lesions and many more. Determining our patients' high-risk factors for oral disease and systemic health is multi-factorial, and our role as dental professionals allows us to evaluate the first signs of disease.

This program will help you and your team review the patients' risk factors in-depth, while empowering the clinician to compare clinical technologies that align with the patient's lifestyle to reduce disease.

Course Objectives:

- Review the role of pH in the caries risk assessment and learn to identify stages of demineralization and remineralization
- Learn how to expedite risk assessments to enhance patient education and prevention
- Prioritize the patients' high-risk factors to comprehensively decrease their risks of oral disease and systemic health
- Evaluate the latest clinical technologies and homecare technologies to decrease patients' oral and systemic disease risks

Recommended for: Everyone

Thursday, November 3, 2022

PROGRESSIVE PERIODONTAL THERAPY

Amber Auger RDH, MPH

Thurs., Nov. 3, 2022
8:45am - 11:45am (3 CE hrs)
Room 106-B

This course is supported, in part, by educational grants from GC America, Orasoptic and Waterpik.

Identifying disease at its earliest stages is essential to prevent the progression of oral and systemic diseases. Proper classification of our patients' risk factors and potential rate of progression enables the dental hygienist's role to be fully maximized. This creates a practice that is in full alignment with the standard of care, as well as a thriving practice.

Course Objectives

- Access the 2017 APP Periodontal Classifications and review case studies
- Discuss treatment recommendations based on patients' stage and grade
- Evaluate communication techniques to increase patient acceptance
- Discover common billing errors that prevent insurance coverage
- Review new and innovative ways to improve the chairside experience for both the patient and the clinician; including voice recognition technologies, instruments and new homecare items that will optimize patient compliance
- Identify best practices of power instrumentation and latest hand scaling techniques

Recommended for: Everyone

ORAL CANCER: DIAGNOSIS, MANAGEMENT AND RETURN TO NORMAL LIVING

Michael R. Markiewicz, DDS '08, MPH, MD, FRCD(C), FAAP, FACS

Thurs., Nov. 3, 2022
9:00am - 12:00pm (3 CE hrs)
Room 101-D

Alumni Speaker Series

The staging of oral cancer has been modified with the advent of the 8th Edition of the AJCC Guidelines. The surgical management of oral cancer has changed modestly in the past 50 years. Reconstruction and dental rehabilitation of the oral cancer patient, however, is advancing at a significant rate. Computer assisted surgery has allowed for what were previously unobtainable outcomes, and lowered the duration of treatment for the oral cancer patient in need of reconstruction and dental rehabilitation. This talk will focus on full dental rehabilitation of the oral cancer patient and returning them to their normal daily life.

Course Objectives:

- Be able to identify lesions associated with oral cancer
- Describe the diagnosis of oral cancer
- Be able to describe the general management of oral cancer
- Be able to describe the reconstruction of oral cancer defects
- Be able to identify the critical steps to dental rehabilitation of the oral cancer patient

Recommended for: Everyone

INFLAMMATION AND IT'S IMPACT ON ORAL HEALTH AND SYSTEMIC HEALTH

Thomas E. Van Dyke, DDS, PhD

Thurs., Nov. 3, 2022
1:00pm - 4:00pm (3 CE hrs)
Room 101-A

Robert J. Genco Distinguished Speaker Series

Alumni Speaker Series

Recent studies have suggested a relationship between oral infection; in particular periodontal disease and systemic diseases. Epidemiologic studies have implicated periodontal disease as a risk factor for the development of cardiovascular disease and stroke, and studies in diabetics have revealed that untreated periodontal disease can lead to diabetic complications and have a direct impact on glycemic control. It has become clear in recent years that periodontitis is an inflammatory disease that is linked to dysbiosis of the oral microbial biofilm. This distinction implies that it is the host response to the biofilm that destroys the periodontium in the pathogenesis of the disease. It is now clear that oxidative stress related to excess inflammation plays a role in the pathogenesis of periodontitis. However, there is limited data on the ability of antioxidants used therapeutically to significantly alter the course of local periodontitis or the associated systemic conditions. As our understanding of pathways of inflammation has matured, a better understanding of the molecular basis of resolution of inflammation, which is distinct from pharmacologic anti-inflammation, has emerged. Resolution of inflammation is an active, receptor agonist mediated well-orchestrated return of tissue homeostasis, not inhibition of proinflammatory pathways, that includes significant reductions in oxidative stress. The isolation and characterization of endogenous lipid mediators of resolution, called lipoxins and resolvins, has opened new doorways for the management of periodontitis and systemic inflammatory diseases. This presentation will review resolution of inflammation, and the role of inflammation and its control in the link between periodontal inflammation and

inflammatory systemic diseases (including type 2 Diabetes), cardiovascular disease and others.

Course Objectives:

- Understand the relationship between inflammation, bone loss and tissue regeneration in periodontitis
- Explain the mechanism of action of periodontal regeneration; why it works and doesn't work in different situations
- Discuss potential modifications of treatment regimens for the patient with periodontitis to control inflammation, prevent further damage and achieve true periodontal regeneration
- Understand the biologic basis of the relationship between periodontitis and systemic disease
- Develop a working knowledge of inflammatory interactions leading to and linking the common diseases of aging
- Discuss the modifications of treatment for the patient with periodontitis and complicating systemic disease

Recommended for: Everyone

CONVENIENCE TO COLLECTION TO CASH: TOOLS TO ACCELERATE PRACTICE CASH FLOW

DRILLING DOWN: TOOLS FOR A SUCCESSFUL TRANSITION

Melissa Kwiatkowski, CMPE

Thurs., Nov. 3, 2022
9:00am - 12:00pm (3 CE hrs)
Room 103

This course is supported, in part, by an educational grant from KeyBank.

INTEGRATE WELLNESS INTO YOUR CHAIRSIDE CONVERSATIONS

Uche Odiatu BA, DMD

Fri., Nov. 4, 2022
8:30am - 11:30am (3 CE hrs)
Ballroom

This course is supported, in part, by an educational grant from Philips Sonicare and Zoom Whitening.

Our patients don't leave their stressful jobs, poor sleeping patterns (insomnia, apnea, snoring), physical fitness (or lack of) or eating patterns (mindless eating and evening feeding frenzies) in the car before they sit in our chair. There's irrefutable scientific evidence that these habits can ramp up inflammation or dial it down. Well adjusted, rested, physically active, healthy eating patients enjoy a physiology that supports a better response to our prevention/restorative interventions. In this high-energy morning program, be prepared to have your hair blown back.

Course Objectives:

- Discover how eating habits can dial down or ramp up inflammation and how it affects your treatment outcomes
- Learn why it's important to identify the sleep-deprived patient (not just apnea) right away at the new patient exam
- Understand why your sedentary patients don't heal as well as your active living patients. (ALERT: 85% of your patients lead sedentary lives)
- Gain greater insight into the relationship between chronic inflammation & disease

Recommended for: Everyone

MAXIMUM IMMUNITY: FORTIFY YOUR BODY'S NATURAL DEFENSES!

Uche Odiatu BA, DMD

Fri., Nov. 4, 2022
1:00pm - 4:00pm (3 CE hrs)
Ballroom

This course is supported, in part, by an educational grant from Philips Sonicare and Zoom Whitening.

With the recent global pandemic, a healthy immune system is on everyone's point of mind. Vaccinations have been front and center but how else can we support and quite possibly maximize our immune system? Dental industry professionals have known for years that the body is better able to fight other infections if there is optimum oral health. There are brand new developments on how you can FORTIFY your patients' natural defenses and reduce disease risk and increase healing.

Course Objectives:

- Learn the different aspects of immune health, healing and overall vitality
- Discover the best nutrition to create a body that is a fortress against illness
- Gain insight into simple strategies that strengthen your patients' immune system at a cellular level
- Enjoy a deeper communication chairside with a better understanding of the body mind connection

Recommended for: Everyone

LASERS IN DENTISTRY: CURRENT APPLICATIONS AND FUTURE DIRECTIONS

Praveen R. Arany, BDS, MDS, MMSc, PhD

Fri., Nov. 4, 2022
8:45am - 11:45am (3 CE hrs)
Room 101-B

Light is central to clinical dentistry, from operating lights to light-cured restorations. Lasers in medicine have been commercially available since the 1960s; the first dental laser for hard tissue applications was approved by the US FDA in 1997. Dental surgical laser technology has evolved significantly during this past decade, improving its clinical utilization. There are several myths about surgical lasers that will be addressed in this talk. Further, there has been an evolution of several non-surgical light applications such as antimicrobial photodynamic therapy and photobiomodulation therapy. This talk focuses on the mechanistic rationale of each approach, emphasizing their differences and clinical utility.

Course Objectives:

- Appreciate the broad principles of surgical dental lasers
- Examine the myths and fallacies of laser use in clinical dentistry
- Differentiate between non-surgical laser applications in dentistry

Recommended for: Dentists, Hygienists and Dental Assistants.

HPV: WHAT YOU AND YOUR PATIENT SHOULD KNOW

Jennifer L. Frustino, DDS '09, PhD

Fri., Nov. 4, 2022
8:45am - 11:45am (3 CE hrs)
Room 106-B

Alumni Speaker Series

About 80 million people in the US are currently infected with the human papillomavirus (HPV). Almost all sexually active people will get HPV at some time in

their lives. If HPV is not eliminated by the immune system it can lead to oropharyngeal, cervical, anal or genital cancer. Fortunately, there is a vaccine against HPV. This course will discuss in detail what HPV is, how it is transmitted and its role in oropharyngeal cancer. The course will then focus on HPV prevention through vaccination and provide tips on how to effectively talk to patients about HPV, cancer and the vaccine.

Course Objectives:

- Define what HPV is, how it is passed, diagnosed and prevented
- Detail the role of HPV in oropharyngeal cancer
- Describe why HPV vaccination is important for cancer prevention
- Identify the appropriate HPV vaccination schedule and recommendations based on patient age
- Develop self-efficacy in delivering effective HPV vaccination recommendations

DENTAL IMPLANTS FOR THE GENERAL DENTIST FROM SINGLE TOOTH REPLACEMENT TO OVERDENTURES

Gordon Fraser Jr., DMD

Fri., Nov. 4, 2022
9:00am - 12:00pm (3 CE hrs)
Room 101-C

This course is supported, in part, by educational grants from Pearl, Kettenbach, Ritter Implants, and Doxa Dental, Inc.

Ready to make Implant Dentistry simple, affordable and predictable... while creating new revenue streams for your practice? Anticipating a huge investment of time and money, many dentists do not place and restore dental implants. Others have been to training courses and purchased an armamentarium that is now collecting dust because they have difficulty imparting the kind of information needed for their staff to play a vital role in implant procedures. This course is for both types of dentists. Dr. Fraser demystifies implant dentistry and shows offices how to seamlessly integrate this vital dental procedure. More importantly, this course shows how to make implant dentistry cost effective, efficient and affordable for patients.

After all, people want teeth - not dental implants. Designed for the general dentist who has limited or no experience with dental implants, attendees will learn the importance of treatment planning, diagnostics and radiographic interpretation. This course covers procedures such as single tooth replacement, overdentures and multiple tooth replacement in easy-to-follow, step-by-step protocols.

Course Objectives:

- Guide the patient through the decision of fixed vs. removable prosthesis
- Understand the appropriate use of traditional vs. mini-implants
- Analyze CBCT scans to identify ideal sites for implants
- Evaluate the anatomical limitations of each case
- Learn chairside techniques for denture Locator® attachments
- Discuss bone biology and osseointegration for clinical success
- Perform the pre-implant oral, anatomical and radiographic exam
- Modify an existing denture to utilize implants
- Prepare the surgical site for the placement of 2-4 implants
- Select the optimal retention attachment to achieve the desired result

Recommended for: Dentists

UNDERSTANDING THE DO'S AND DON'TS, THE WILL AND WONT'S OF THE SOFT TISSUE

Gordon Fraser Jr., DMD

Fri., Nov. 4, 2022
1:30pm - 4:30pm (3 CE hrs)
Room 101-C

This course is supported, in part, by educational grants from Pearl, Kettenbach, Ritter Implants, and Doxa Dental, Inc.

Knowing what is possible for your specialist and what is not is key to good referrals and better communication. When your specialist knows you and understands what you are asking them to do for you, not only will they do a better job for you, but they will do only what you ask and not what they think your patient needs. There is a reason for this and we will address it in our time together. Now is the time for the general dentist to take back their right position as the leader or better yet the quarterback of their patient's care.

Course Objectives:

- Educating the patient as to what is needed why and what is possible for root coverage and setting expectations
- Teaching the GP how to perform root coverage procedures (simple four-step process)
- Understanding what types of lesions yield different results in terms of root coverage percentage
- The key to any good job is using the correct instruments and materials
- Understanding the anatomic features for diagnosing pathology and or structural defects in the hard and soft tissues and how they are related
- Define mucogingival therapy and explore specific considerations

- Facts, theory and specifics to include case studies and examples
- Compare and contrast different grafting materials (allografts, xenografts, autographs) including particle sizes
- Discuss the pros and cons of growth factors to include different types

Recommended for: Dentists and Hygienists

HOW TO BE YOUR OWN PROSTHODONTIST

Peter Auster, DMD

Fri., Nov. 4, 2022
9:00am - 12:00pm (3 CE hrs)
Room 106-A

Supported, in part, by educational grants from Pearl, GC America, VOCO, DMG America, Kettenbach Dental and Tokuyama.

We face difficult cases every day in our offices. We must determine where we "want to go" and how to reach that goal. A long-time Academy of Cosmetic Dentistry leader shares the tips and pathway to becoming the dentist you always dreamed you would be. Gain confidence today as we review multiple cases.

Course Objectives:

- Learn a systematic way to simplify and treat any case
- How to phase cases for any budget with injection molding
- How to determine which indirect material to use for each case
- When to use deprogrammers as a diagnostic and therapeutic tool
- How to attract more cosmetic patients and get your staff excited to encourage them

Recommended for: Dentists

TAKE THE "DENTS" OUT OF DENTISTRY

Peter Auster, DMD

Fri., Nov. 4, 2022
1:30pm - 4:30pm (3 CE hrs)
Room 106-A

Supported, in part, by educational grants from Pearl, GC America, VOCO, DMG America, Kettenbach Dental and Tokuyama.

Imagine a "jump-start" to revitalize your dentistry and your life. This fun presentation provides concrete tips to make every dental day better via new techniques, practice management tips and great new products that will benefit your patients. Expect a lot of "gems" and solid information to use on Monday morning.

Course Objectives:

- Learn how to take charge of your dental world - eliminate the negative and add what makes YOU smile
- Introduce 30 better, brand-new, more economical products to use on Monday morning
- Learn about the latest esthetic zirconias and when to use each
- Discuss why it's time to throw out all pre-pandemic cements and get newer, better ones
- Learn why it's time to adapt AI dentistry in every office
- Why most of us left dental schools with "dental imposter syndrome" and how to triumph over it

ORAL HEALTH IN AMERICA: WHERE DO WE GO FROM HERE?

Marko Vujicic, PhD & Chelsea Fosse, DMD

Fri., Nov. 4, 2022
10:30am-12:00pm
(1.5 CE hrs)
Room 101-D

This presentation is supported by the Eighth District Dental Society and the UB Dental Alumni Association.

Both speakers, Dr. Marko Vujicic and Dr. Chelsea Fosse, will host this presentation virtually. This will be an interactive workshop.

What is the dental profession's vision for oral health in America? The newly published 20-year retrospective of trends in oral health released by NIH shows that there have been important gains in oral health among children; however, much less progress among adults and seniors. About half of the U.S. population does not visit the dentist within the year, with affordability challenges being reason #1.

Our dental care financing and delivery model works well for some segments of the U.S. population and not others. At the same time there is a major generational shift happening in the dental profession, including shifts in practice models, career paths, and even ADA membership trends. We have an opportunity to elevate dentistry into a truly essential health care service. Does the profession want this? What are the implications? Let's discuss! Join the ADA Health Policy leaders as they discuss their report and research on this publication and what it means for dentistry.

Recommended for: Dentists.

SPECIAL NEEDS DENTISTRY: TREATING THE NATION'S MOST UNDERSERVED POPULATION

Elizabeth B. Kapral, DDS '13, MS & Courtney Peterson, DMD

Fri., Nov. 4, 2022
1:00pm - 4:00pm
(3 CE hrs)
Room 106-B

Alumni Speaker Series

Persons with intellectual/developmental disabilities (IDD) experience dental disease at a higher rate than their nondisabled counterparts. Unfortunately, this population also reports significant barriers to receiving dental care. With hospital emergency rooms fielding dental complaints at much higher costs, it is imperative that all dentists are comfortable meeting the routine needs of this vulnerable population. Significant data supports that while dentists desire to treat individuals with IDD, many feel that they do not have sufficient training to provide care.

Along with some basic tips and tricks, an open mind to finding case specific innovative methods is all that is needed.

Course Objectives:

- Describe the impact of common intellectual disabilities on oral health
- Determine appropriate behavior guidance techniques on a case dependent basis
- Recognize adjunctive techniques and equipment that are helpful for patients with special needs
- Discuss various treatment plans on a case-dependent basis

FORENSIC ODONTOLOGY – WHERE THE JAW MEETS THE LAW

Randolph L. Mitchell, DMD

Fri., Nov. 4, 2022
1:00pm - 4:00pm (3 CE hrs)
Room 101-B

The objective of this course is to help attendees understand the role dentistry plays in the legal system. This course will focus on dental identification, discussing the axioms, principles and techniques used in making a positive dental identification of human remains. Case studies will be used to illustrate the techniques in use on several different types of remains. The role of dental professionals in assisting the Forensic Odontologist will be outlined in detail.

Course Objectives:

- The basic process of dental identification of human remains
- Understanding remains conditions that indicate the need for dental identification
- What dental information to send to the Medical Examiner/Forensic Odontologist when patient dental records are subpoenaed in an identification case
- The importance of great patient record keeping

Practice Management Bridge®

Improve the patient experience and increase your bottom line

Practice Management Bridge is a healthcare technology solution that interfaces with your practice management software and allows you to capture more payments, while enhancing the patient experience.

A safe, secure, seamless solution

Text

Allow patients to pay through a convenient mobile message.

Online

Offer patients access to a simple and secure payment link to your website.

As simple to implement as it is to use, the touch-free technology of Practice Management Bridge streamlines the patient payment process before, during, and after visits.

Mobile

Communicate with patients through their hand-held devices.

Contactless

Provide a safe, touchless method of in-office payment.

Let's start the conversation

Visit key.com/kms, or contact your Small Business Specialist:

The era of the powered loupe has arrived.

Introducing Dragonfly: a new species of loupes that seamlessly integrates a built-in headlight.

The better your equipment, the better your work. But there's something to be said about how your equipment makes you feel. Sleek. Agile. On top of your game.

You have never owned a loupe like this because there has never been a loupe like this.

Empower yourself with the vision and freedom to perform at your peak.

Every year, at the Reunion Dinner Dance, the UB Dental Alumni Association gives out two awards: the Honor Award and the Distinguished Service Award to deserving alumni. Join us in congratulating the award winners on the next page of the program.

DISTINGUISHED SERVICE AWARD

The Distinguished Service Award is given in recognition of outstanding leadership, advocacy and support to the dental profession, the UB School of Dental Medicine and the Alumni Association. This year's recipient is...

LAWRENCE E. VOLLAND, DDS '75

Dr. Volland, a native of Kenmore, earned a B.S. degree from St. John Fisher College in 1971. He graduated from SUNY at Buffalo School of Dental Medicine with Thesis Honors in 1975 and after a short stint with the Erie County Public Health Department, entered private practice in Lockport, NY. Beginning in 1977, Dr. Volland worked as a part-time Clinical Instructor in the Department of Operative Dentistry at UB. He continued in that position for six years. Dr. Volland continues to practice part-time after selling his solo practice in May 2022.

Dr. Volland has been active in organized dentistry at all levels of the tripartite and his involvement started before graduating. In 1973, the Eighth District Dental Society approached the dental school for a student to sit on the Society's Executive Council. Dr. Volland was appointed, making the EDDS the first component dental society in the State to have student representation. Dr. Volland served as President of the Eighth District Dental Society in 1994 and President of the New York State Dental Association in 2005. He served as a delegate and alternate delegate to the ADA a total of nineteen years, and has held Council and Committee positions at the ADA, including five years on the Board of ADPAC. Dr. Volland was awarded The Distinguished Service Award by NYSDA in 2018, and he considers it a great honor having been selected as Commencement Speaker to the SUNY at Buffalo Dental Medicine Class of 2005. Dr. Volland has also held leadership positions in the International College of Dentists and the American College of Dentists.

Dr. Volland continues as a Director on the Board of NYSDA Support Services, a position he has held since 2003. He is Treasurer of the New York State Dental Foundation and has been a member of the Board of Directors of the Empire Dental Political Action Committee since 1994, serving as Chairman for nine years starting in 2006. Locally, he is a long time Director, and has served as Chairman, on the Board of The Dale Association, a mental health and senior services agency in Niagara County.

As he eases into retirement, Dr. Volland is looking forward to spending more time in his garden and traveling with his wife, Judy, particularly if it is to see their four grandchildren and three great-grandchildren.

YOUR PARTNER IN DENTAL EXCELLENCE

INDEPENDENTLY OWNED FULL-SERVICE DENTAL LABORATORY

*By choosing **Vital Dental**, you're choosing a local lab backed by a wealth of technical experience, industry research and access to cutting-edge products from manufacturers.*

We pride ourselves on taking the necessary steps to stay ahead of the curve in the dental industry.

While we're proud to be leaders in the industry, we remain committed to your practice and your patients.

WHY WORK WITH VITAL DENTAL?

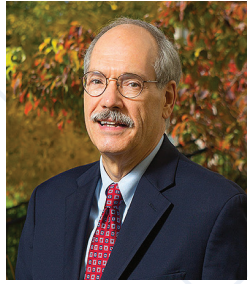

- Use only ADA-Approved Materials
- Perform Quality Control Checks on every case
- Make all products in Buffalo, New York
- Invite all doctors to come and inspect our lab
- Provide Continuing Education to dental office staff

HONOR AWARD

The Honor Award is given to an individual whose enthusiastic and untiring endeavors have helped to promote continued growth, development and success of the UB School of Dental Medicine. This year's recipient is...

JOSEPH J. ZAMBON, DDS '74, PERIO CERT. '83, PHD ORAL BIOLOGY '84

A lifelong resident of Western New York, Dr. Zambon spent his career as a faculty member at UB Dental joining in 1982 and rising to the rank of tenured SUNY Distinguished Teaching Professor. His service to the School is also impressive with roles of Program Director, Associate Dean for Academic Affairs and most recently as Dean since 2016.

An internationally recognized oral microbiologist, he has authored or co-authored more than 200 scholarly papers including three of the 100 most highly cited papers in dentistry. He has been principal or co-principal investigator on more than 60 grants securing more than \$11 million in grant funding over his career.

Among Dr. Zambon's numerous awards are twice named Dental Educator of the Year, the UB Exceptional Scholar Award, the R. Earl Robinson Periodontal Regeneration Award and the Clinical Research Award both from the American Academy of Periodontology.

As Dean, Dr. Zambon led the School in creating and implementing a new strategic plan focused on growing research capacity; providing transformative educational opportunities; improving clinic operations; recruiting excellent and diverse faculty, staff and students; and enhancing the school's visibility.

He has worked to transform the School's facilities including a preclinical simulation center that includes computer-aided design and manufacturing labs, an optical imaging and analysis research core facility, and a clinical dental implant center. Also implemented is a new electronic health record and clinical management system to improve operation of the teaching clinics.

Dr. Zambon also led a comprehensive campaign to raise funds to support the school's world-class research and education programs, its clinical facilities and student experience initiatives. The campaign has so far received more than \$30 million in gifts, including four gifts over \$1 million to support construction of new facilities and scholarships.

Under his leadership, the School achieved recognition as one of the nation's top dental schools including being ranked Number 8 in the nation and Number 9 worldwide in the highly influential 2020 Annual Ranking of World Universities.

Frequently Asked Questions

Can I register on-site if I didn't pre-register?

Yes! Onsite registration is on Wednesday, November 2, from 2:00pm–7:00pm, Thursday, November 3, from 7:30am–4:00pm and Friday, November 4, from 7:30am–1:00pm, at higher prices.

If I pre-registered, do I receive free parking and where?

Yes! If you pre-registered you receive FREE parking at Buffalo Riverworks, 359 Ganson St., Buffalo, NY 14203; including Door-to-Door Shuttle Bus Service.

What is included in my pre-registration fee?

Included is access to obtain up to 15 CE credits from November 2–4, 2022, access to the exhibit floor all three days, Wednesday's "Staff Appreciation" Party, enter to win one of five \$100 gas cards, and a drink ticket for Happy Hour on the exhibit floor from 4:00pm–5:30pm on, Thursday, November 3, 2022.

What will I receive in the mail if I pre-register?

If you pre-register before October 20, 2022, you will receive your badge that you MUST bring with you to the meeting for access to the exhibit floor and to attend lectures.

What do I do if I lose or forget my badge?

We ask again that you PLEASE bring your badge with you that was mailed, but if you do forget it or lose it, come to the Duplicate Badge area in the lobby and one of our team members can make you another.

If I have questions regarding the Buffalo Niagara Dental Meeting who do I contact?

Call the UB Dental Alumni office at: (716) 829-6419.

Where do I find the Buffalo Niagara Dental Meeting on social media?

Facebook: @buffalodentalmeeting

Twitter: @bndentalmeeting

Instagram: @bndentalmeeting

LinkedIn: Buffalo Niagara Dental Meeting

What is the cancellation policy?

Cancellation requests MUST be received in writing before October 20, 2022. All approved refunds are subject to a \$25 processing fee. NO refunds will be made for cancellations requested after October 20, 2022.

How do I receive CE credit for lectures I attend?

One CE Verification Form will be included in your registration packet for ALL lectures you attend throughout the meeting. Complete the verification form as you attend lectures, including course titles, instructor's name, and verification numbers. Submit the top copy of the verification form WHEN YOU COMPLETE YOUR LAST COURSE. Keep bottom/carbon copy for your records. This is your only record of attendance! Collection boxes are located in the convention center lobby. CE Verification Forms MUST be submitted at the convention center and will not be accepted after the meeting.

Can I bring my spouse if she/he is not in the dental profession?

Yes! Guests of dentists are offered guest passes at no charge. Guests cannot be in the dental field and are not eligible for CE credit.

I do not need CE and I just want to visit the exhibit hall, what can I do?

Wednesday, November 2, 2022, is FREE for everyone from the hours of 5:30pm–7:30pm.

Come see the latest in dental technology while enjoying music, cocktails, and light food.

Where do I get my handouts?

All handouts that are sent by the speakers will be available online at: bndmeeting.com. Printed handouts will not be available onsite.
